

Luma Circle

Impact framework

Planning targets and measurement commitments • October 2026

2031 measure	Planning target
Women and households with reliable power	500,000
Patient interactions for women and girls	1 million
Women health workers employed	5,000
Finance mobilised to women-led enterprises	\$100 million
Women founders accelerated	200
Portfolio companies	25
Women with digital credit histories	25,000
Women-designed and women-led interventions	100%

Measurement

Metrics are generated by platform transactions or surveys at engagement start and 24 months later. Data is sex-disaggregated from day one and aligned to IRIS+ and the 2X Challenge.

Verification

An independent assessor verifies the 100% women mandate annually. Verification releases half of management carried interest. At least one third of accelerator places and fund capital prioritise fragile and conflict-affected settings.

Evidence

Savings-group evaluations by IPA and J-PAL inform the approach. An anonymised dataset supports research on women's collective entrepreneurship led by the CEO's doctoral work.

Important information

This summary reflects the supplied website content, not an independently validated operational framework. Targets are planning assumptions to be validated during the 2027 set-up phase. This document is for information only and is not an offer of securities or investment advice. Contact:
